Kevin Bluett,  
HubSpot,  
2 Dockland Central,  
Guild St,  
Dublin 1

## Profile

26-year-old Technical Lead at HubSpot. Alumni of Trinity College Dublin computer science with experience of running a 7 person development company.

## Experience

**Technical Lead, HubSpot — September 2015 - Present**  
Ongoing role

### **CTO & Founder, Fullstack Ltd. — May 2013 - November 2013**

Started and grew a company from zero to mid-five figure revenue within 3 months, without any external investment. We mainly provided prototyping and concept services to VC backed startups in Ireland and the United Kingdom. The projects ranged from Web Apps to mobile apps. At its height I managed a team of 4 developers and one UX/UI designer, and our office was located in Dublin equivalent of SoMa.

### **Founder, Tophat — November 2011 - December 2012**

TopHat was a start-up developing a simple-to-use framework that allows you to build and create collaborative and multiplayer mobile apps. Additionally, we provided consultancy services in the areas of web development and mobile apps. We convinced Demonware founder Sean Blanchfield, to mentor us and provide us with some awesome office space.

## Education

**Trinity College Dublin — Computer Science BA(mod) 2011-2015**  
Graduating with First Class Honours

## Larger Projects

### **SuperAwesome Network — April 2013 - August 2013 (Fullstack Ltd. Client)**

Developed the second iteration of the “Box of OMG” and “Box of Awesome” web apps for the SuperAwesome network. Services included interacting directly the shipping API, from an in-place manual ordering system. Provided transitioning services to a newly hired team in London. (Technologies: PostgreSQL, Django, Heroku, SOAP API)

### **45sound / Fanfootage August 2013 - October 2013 (Fullstack Ltd. Client)**

Fullstack provided development services to the 45sound to develop their mobile apps for both iOS and Android. Personally developed much of the Android app. (Technologies: Java/Android)

---

### **BT River of Music — 2012 (Freelance)**

The BT River of Music was a free music festival run in London a month before the olympics, with 5 stages across London, each stage themed to a different culture. Provided system admin services for a site that had over 180,000 unique visitors over the course 48 hours of the music festival. Developed the site from the PSDs provided from the designer, and integrated designs to the Expression Engine CMS. (Technologies: ExpressionEngine, LAMP)

### **Open Source TopHat Platform — November 2011 - December 2012**

Helped in the development of Python and the Java/Android sections of the TopHat platform. The python section was a server implementation from low-level of networking all the way up - including a custom protocol. (Technologies: Python, Android/Java)

### **Skills**

Developing in Java (Mainly Android), Python, PHP & Javascript. Furthermore, through college I have dabbled with C, C++, C#, Prolog, Haskell and ARMv6 ASM.

### **Recognition**

#### **ACM Irish Collegiate Programming Contest (IrCPC) 2012**

Together with two other undergraduates from Trinity College we achieved the 3rd place in the national collegiate programming contest.

#### **National Irish BT Young Scientist Exhibition:**

**2010** Won 1st in Senior Individual Technology in the “BT Young Scientist Competition 2010” for development of a custom distributed computing system, and attempting to use this simulate the spread of a virus.

#### **Other awards:**

**2009** Intel Excellence in Science Award

**2009** Highly Commended in the “BT Young Scientist Competition 2009” for a entirely custom software classroom teaching tool.

**2009** Intel Best Project award for the classroom teaching tool at the Carlow Scifest.

### **Hobbies**

- Amateur Cellist and player in Trinity Orchestra since 2011. Treasurer of Trinity Orchestra 2013-2014.
- Coffee nerd, have a HX espresso machine + grinder in my apartment
